

Green Team Meeting 3.24.2021

Call to order 7:18 pm

Flag Salute

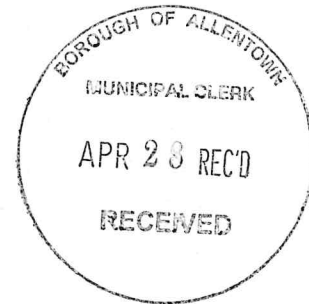

Roll Call:

Mayor Thomas Fritts

Council Member: Erica Torsiello

Stephanie Lipnicki

Barbara Pleva

Approval of Minutes from 2.24.2021

Barb Pleva Motion to approve

Second Erica

All approve

Do we (The Green Team) supply Laurie and Nicholas the information or do we go through the information and do we write 300 word documents.

Energy Efficiency - Barb Pleva gathered the info for this section, on the action page it asks for 300 words or less.

Mayor Thomas Fritts proposed we give the information to the agents and they write up the documentation.

Erica T. found the water conservation documentation is from the 70s and is somewhat outdated and may need to be updated.

Rick explained that they have a model to follow and shared the provisions regarding the water conservation.

Mayor Fritts:

- For example residents can install a second irrigation meter for use with irrigation
- We can send (Erica said she will) send to the Water Commission / Committee

- We would need to take action steps to show that we are taking steps towards improved diversity

MTF: We can use Survey Monkey to mail to the groups

RJ - Delran has a one page doc that their Green Team used to evaluate committees (gender, ethnicity, age, marital status, languages, employment status, etc); we match this to the census data to see where we state

ET: Put the census data in the Green Team document

RJ: Emergency Management and Resiliency

- 10 pts for climate adaptation flooding risk (might be 20 pts)
 - Evaluate the coastal flooding risk
- Improve overall resiliency of the community - sea rise, storm surge
- Could be green team but better to have emergency management
- Flood map tool
 - 100 year flood, 500 year flood for example
 - Probasco for example is part of the 'potential flood zone'
- Community evaluation tool
- Complete the documentation, completion required within 3 years of the June application date
 - Part of the master plan
- MTF - we also have flood mitigation, OEM manager would be helpful
- Identify reps and form a team; print the map, and complete 3rd step
- MTF - waste treatment plant was built with the 500 year flood in mind
- We need to determine who the OEM people are and have them complete this portion (should be 2-4 hours of time)
- RJ will look into emergency management and resiliency

RJ: Land Use and Transportation Pledge

- Pledge to support sustainable land growth and use policies
- Long term re-evaluation of land use
- RJ will send this resolution to MTF and send it forward to planning commission
